- Where appropriate, slide doors and windows allow for flexibility and activities may spill onto the sidewalks
- Clear glass fenestration TO allow for transparency.
Minimum of 65% fenestration on street frontage

- Decorative fixtures like sconces and facade up lighting on the storefront should be encouraged.
- Storefront displays should be well lit and stay on past store closing to activate the street.

Signage

- Custom and artistic signage are required rather than conventional acrylic and/or plastic faced signs that are internally lit
- Signage should be graphically oriented or three dimensional

- Signs should be lit with small, shielded light sources as opposed to floodlighting
- Signs should be limited in size and scale in keeping with a pedestrian environment
- The architectural elements of the façade should be considered when determining the size and location of the sign
- Signage should focus on creative under canopy signs, blade signs and window signs
- Blade signs are preferred.

 - d. 7'-6" clearance shall be provided between the baseline of any sign and the sidewalk.
 - e. Blade signs shall have a maximum depth of 12" if located at a height less than 9'-0", and a maximum depth of 18" if located at 9'-0" height or higher.
- Allow chalkboard and high-design sandwich board signs.

Curb Appeal

- Sidewalk merchandise displays and planting boxes are encouraged
- Tree well fencing and planting provide an opportunity to individualize a store

Window Displays
